DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-5, 7-11, 14, and 21-23 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The term “stem portion:” is not supported by the specification as originally filed.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-5, 7-11, 14, and 21-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 – line 5-6 recite, “the shaft and the hand grip portion having a longitudinal axis and fits as a cap over the top upper end.”. The limitation is not clear. Also, the claimed “stem portion” (not found in the spec) appears to serve as a duplication of the plate. According to the specification the “plate” is bent and twisted.

Art Unit: 3711

However, applicant claims the "stem portion" is bent and twisted while being attached to the "plate".

Claim 11 – "stem portion" is not clear. No "stem portion" in specification being bent and twisted while attached to the "plate".

Claim 22 – "stem portion" is not clear. No first and second "stem portion" in specification being bent and twisted while attached to the first and second "plates".

Claim 23 – Not possible for the second and third angle to be equal to 15 and 45 degrees simultaneously.

Response to Arguments

Applicant's arguments, filed 12-3-04, with respect to the rejection(s) of claim(s) 1-16 under Marshall, Vasquez and Lin have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection (35 USC 112) is set forth above.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 3711

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
